

WEEKLY SUMMARY REPORT

PROJECT NO.:	2476.0001Y002	WEEKLY REPORTING PERIOD: Monday June 19, 2017 through Sunday June 25, 2017
PROJECT:	CFAC Phase I Site Characterization	
LOCATION:	Near Columbia Falls, Montana	

SUMMARY OF WORK COMPLETED

- Round 4 of Groundwater Sampling
 - Roux Associates, with support from Hydrometrics, began Round 4 of groundwater sampling on June 19, 2017. A total of thirty-six (36) groundwater samples were collected. Groundwater samples were collected from the following locations:
 - CFMW-001, 003a, 007, 008, 012, 012a, 018, 025a, 025b, 026, 031, 032, 033, 034, 035, 037, 040, 042, 043, 044, 044a, 044b, 045a, 047, 049, 049a, 050, 054, 056, 056a, 056b, 057, 057a, 059, 061, 064.
 - Groundwater samples that were proposed for free cyanide analysis were collected, as per Modification #9, in addition to dissolved free cyanide.
 - All of the above groundwater samples were collected for total and dissolved metals, dissolved total cyanide, and dissolved fluoride, which were added to the scope of work as part of the discussions with EPA/MDEQ during revisions of the Phase I Site Characterization Data Summary Report.
 - All samples were sent to TestAmerica of Edison, NJ for laboratory analysis.

SUMMARY OF WORK PLANNED FOR NEXT WEEK / ANTICIPATED SCHEDULE CHANGES

- Planned
 - Roux Associates, with support from Hydrometrics, will complete Round 4 of groundwater sampling.
 - Roux Associates personnel will collect investigation derived waste (IDW) water characterization samples from the onsite frac tank in anticipation of disposal following the completion of Round 4 of groundwater sampling.
- Modifications
 - No modifications to schedule or deviations from Work Plan or Sampling and Analysis Plan.

HEALTH AND SAFETY NOTES

- Roux Associates personnel discussed vehicle safety at the Site and the importance of using a spotter when reversing the vehicle.
- Roux Associates personnel discussed potential ergonomics hazards associated with groundwater sampling.

OTHER NOTES

- No further notes.
